

AMENDMENT TO THE SPECIFICATION

Please amend paragraph [00059] to state the following,

[00059] FIG 7 shows bearing (42) in which both the longitudinal movement and the translational movement are taken by the same bearing with two load carrying sides. In order to keep the sliding bearing in the correct position resistance elements (63) and (64) are located in the fluid supply line (45) 65.
